

COMPONENT DATA SHEET – ALUMINIUM STAIRS

2.0m Aluminium Stair

Description:

Aluminium stairs are prefabricated structure used for workers access to above and below platforms inside the scaffold. They are to be used with a secure handrail for each stair. These stairs made to fit into 1.2m x 2.4m bay.

Specifications:

Aluminium
 2.0m high x 595mm wide

Material:

Aluminium alloy as per AS/NZS1866:1997, Grade 6061 T6 mill finish

| Part no. | Description | Weight (Kg) |
|-----------|----------------------|-------------|
| 2.0MALSTR | 2.0m Aluminium stair | 39.00 |

Compliance:

ALL TURBO components are part of our registered modular prefabricated scaffold system confirming to AS/NZS1576.3:2009

2.0M stairs and handrails are tested and meet the requirement of AS/NZS1576.3:2015 Appendix D & G
